Create a New Class of Enterprise Apps

Hoku**Apps**

Getting to know HokuApps

Reimagine your enterprise with apps customized to your unique ecosystem. HokuApps lets you create smart, agile mobile solutions for even the most complex workflows, deployed in no time.

HokuApps, a mobile application development platform, gives organizations the tools they need to turn app ideas into deployed solutions in a matter of days. It provides pre-built connectors to integrate custom apps with a variety of popular solutions, making it easier to integrate legacy apps with the cloud and roll out new solutions quickly and efficiently.

Build Cloud Apps FAST

Powerful Connectors for
Legacy Systems, ERPs

Custom Forms Available on
Everyone's Device

Available on All Platforms,
Mobiles and Desktops

Deploy Within Days

Rapid app development platforms alleviate the development burden on your IT teams. This is achieved through low-code systems that eliminate the need to write new lines of code for every capability. HokuApps takes this simplicity to another level through solutions like:

- ✓ A central console where users can handle all administrative functions.
- ✓ Data consolidation across all systems within the platform.
- ✓ Interfaces that function equally well across different devices, browsers and operating systems.
- ✓ One-click integration with more than 200 third-party apps.
- ✓ Built-in connectors for legacy and enterprise resource planning systems.

Pre-built tools that drive efficiency

We have built the HokuApp platform with business value as a priority. The system is designed to empower users to create intelligent, agile solutions to fit any of their workflows. With simple user access and reliable security, you'll be able to build out apps that align with specific business needs, even for complex, data intensive processes. This is possible through:

Anywhere, anytime access to the data your users need to get the job done.

Easy-to-deploy framework that makes it easy to deploy solutions with minimal change.

Sophisticated and powerful reporting engine that creates visibility into processes and workflows.

Unified communications capabilities capable of functioning across the entire platform.

Powerful in-built connectors for legacy systems, ERP's

With the enterprise environment dotted with legacy applications and data sources, ERP's, the inbuilt connectors help you make them all work together to streamline any process.

Integrated Platform for all your Business Applications

Make your application available on everyone's device in one go

In an era of bring your own device, Android fragmentation and more, enterprises should ensure that their Rapid MADP allows for the development of apps that can run on all potential operating systems. This includes mobile operating systems as well as web browsers and standard desktop solutions, such as:

- iOS (mobile and desktop)
- Android
- Windows (mobile and desktop)
- Chrome
- Firefox
- Safari

Instantly Webify your Existing Legacy Applications

Legacy apps integration ensures that:

Background databases update automatically based on user activities, preventing duplicate information from residing across systems and making it easier to maintain high levels of data quality

Automated workflows are built on scripts that can be configured to automatically track how and why data moves between various sources, creating built-in audit trails that simplify regulatory compliance.

Data can be moved freely between different apps and services, allowing users to collaborate across lines of the business and take advantage of the full potential of digital tools.

Information is made available on any device type as your various apps and data workflows all co together within the cloud platform.

New functions can be added to apps and services with ease by deploying new connectors or using pre-built low-code packages to fine-tune interfaces or roll out new tools within apps.

HokuApps is a leading mobile application development platform provider. Our pre-built connectors and modules provide easy legacy app integration to the cloud and empower businesses to create custom solutions based around their specific operational demands. HokuApps provides the platform and tools needed to get proprietary apps rolled out in a matter of days.
